4-Year Cohort High School Graduation Rate

4-Year Cohort High School Dropout Rate

Calculation Formula for 4-Year Cohort Graduation Rate

The 4-year cohort graduation rate is calculated by taking the number of cohort members who earned a regular high school diploma or earned an adult education high school diploma by the end of year 4 and dividing it by the total number of students in a cohort.

Please see the Glossary at <http://www.cde.ca.gov/snapshot> for further details.

Current law requires local educational agencies to annually update their local control and accountability plans (LCAPs), which contain approximately 26 data elements. The State Priorities Snapshot provides three years of data for those elements where state-level data are available. However, not all measures have three years of data. For example, foster youth data are only available for 2014 and 2015; therefore, only two years of foster youth data are displayed where applicable.

There are three main areas emphasized in the State Priorities Snapshot: Student Achievement, Student Engagement, and School Climate. The year identified in the charts refer to the end of the academic school year. For example, the year “2014” represents data for the 2013–14 academic school year.

For detailed information on each data element, including calculations methods, please view the Glossary at <http://www.cde.ca.gov/snapshot>.
