FOR IMMEDIATE RELEASE

January 14, 2022 | El Dorado County, CA

EDUHSD COVID-19 Testing for January 14-17, 2022

The following message contains information regarding limited free COVID-19 testing opportunities for staff and students in the El Dorado Union High School District (EDUHSD) with additions for the weekend of January 14-17, 2022.

Please read carefully as there is specific information regarding what is available and the related registration links for each opportunity.

Members of the EDUHSD learning community may test with Heal 360 testing at the testing pod located at El Dorado High School tomorrow, Saturday, January 15, 2022 and Monday-Friday, 8-5. Pre-register for testing with Heal360: <https://inspireiagnostics.com/el-dorado-union-high-school-district>.

Please do not block driveways of neighbors or create a traffic problem for the neighborhood.

EDUHSD is offering limited rapid antigen testing for staff or students of EDUHSD in need of a COVID-19 test to return to school after quarantine or isolation. If you are unable to find an alternative location for testing, we are offering limited rapid antigen testing at Ponderosa High School in front of the Main Office from 10:00 a.m. - 1:00 p.m. on Monday, January 17, 2022. This is exclusively for students and staff who require a negative test to return to school from isolation or a modified quarantine immediately after the holiday weekend. Pre-register for this test to return to school: <https://my.primary.health//eduhsd>

Additional community testing opportunities are available using the following link: [EDCCOVID-19 Get A Test](#)

New: Heal 360 has been working with community partners to identify a new location for community testing for COVID-19. We anticipate that community members will be able to test with Heal360 at a new location starting next week.
